

Live.HOMAG: Create your future

Monday, 27.09.2021: Furniture production

Experience our machines, technologies and production methods in the various application areas and learn all about the benefits that HOMAG solutions offer you. Look forward to exciting expert presentations in which the latest findings, current trends and most important topics will be discussed and don't miss the highlights in the woodworking industry.

7 am

Opening LIVE.HOMAG @ LIGNA.IN
Andrew Swanson, Online Marketing, HOMAG GmbH / Udo Mauerer, Vice President, HOMAG Asia Pte. Ltd. / Eduardo Bezares, HOMAG Indústria e Comércio de Máquinas para Madeira LTDA

7 am – 11 am
UPC+2

More efficiency in furniture production: With optimizations from product to manufacturing organization

This livestream is available in English and the following languages: Chinese & Russian.

- Digital value stream optimization
- Design to Cost
- Automatic production data generation
- Driverless transport systems

Bastian Schulz, Consulting, SCHULER Consulting GmbH / Elias Wagner, Senior Director, SCHULER Consulting GmbH / Maximilian Held, HOMAG Automation GmbH

News about prefabrication in furniture construction - from cutting to edgebanding

- Saw-Storage-Combination - All in one piece!
- Workpiece feeding WZ24
- Flexible production in Batch-Size 1
- powerEdge Pro Duo: Technology -- New features, detection of errors

Michael Diez, Productmanagement, HOMAG GmbH / Jörg Hamburger, Productmanagement, HOMAG Plattenaufteiltechnik GmbH / Werner Brinkhaus, Productmanagement, HOMAG Bohrsysteme GmbH

Strong finish: Furniture construction innovations in finishing - from drilling to packaging

- Plant example for industrial drilling technology from batch size 1 to series production
- Trend topic: Click Furniture
- Packaging and assembly - Solutions for all performance requirements

Werner Brinkhaus, Productmanagement, HOMAG Bohrsysteme GmbH / Frieder Schuler, Vice President Northern Eastern Europe, HOMAG GmbH / Maximilian Held, HOMAG Automation GmbH

Getting more out of it: How furniture manufacturers recognize and activate unused machine potentials

OEE (Overall Equipment Effectiveness) improvement:

- Increase overall asset effectiveness using MMR data
- With the help of our "OEE Improvement" service, you increase the added value of your machines - this means you increase the output while maintaining the same time.
- To achieve this, we analyse the overall equipment effectiveness (OEE) and work with you to identify the greatest potential for improvement, develop sustainable solution concepts and support you in implementing these.

Simon Liller, Productmanagement Service, HOMAG GmbH

Insights for the skilled trades: Forward-looking production & organization concepts in store & interior fitting

Digital assistants and apps

- Furniture production with digital assistants (configuration to assembly)
- Digital ecosystem
- Digital workshop

Panel Dividing

- Power Concept Classic
- Tips & tricks in saw operation on SAWTEQ B-130 and B-200
- Cutting automation in the trade

Edge banding

- Universal premelter
- Automatic glue dosage

CNC technology

- Preview woodWOP 8
- Vertical CNC machining center DRILLTEQ V-200
- The automatic console table A-Flex

Jörg Hamburger, Productmanagement, HOMAG Plattenaufteiltechnik GmbH / Michael Diez,
Productmanagement, HOMAG GmbH / Werner Brinkhaus, Productmanagement, HOMAG Bohrsysteme
GmbH

11 am – 3 pm
