

Strategic.
Efficient.
Focused.

SCHULER Firmen EKG –
Strategic roadmap for the
further development of your
company

SCHULER Company EKG

Strategic roadmap for the further development of your company

Continuous growth and changes in objectives and framework conditions usually go hand-in-hand with a further development of established structures. The SCHULER Company EKG is a strategic road map for the further development of your organization and internal structures. We will draft a strategic concept together on site,

which is, of course, tailor-made to match your corporate goals, processes, production and organization. The objective: identifying potential to increase efficiency and improve performance. The concept study offers you the basis to make focused decisions, implement suitable measures and align your company in a tailor-made and long-term manner.

1 YOUR BENEFITS

- Custom-fit, strategic concept as a road map for future decisions
- Decision making security given that subsequent decisions are based on transparent findings and facts
- Specific recommendations for optimization that can be implemented immediately
- Recommendations for the long-term development of your company

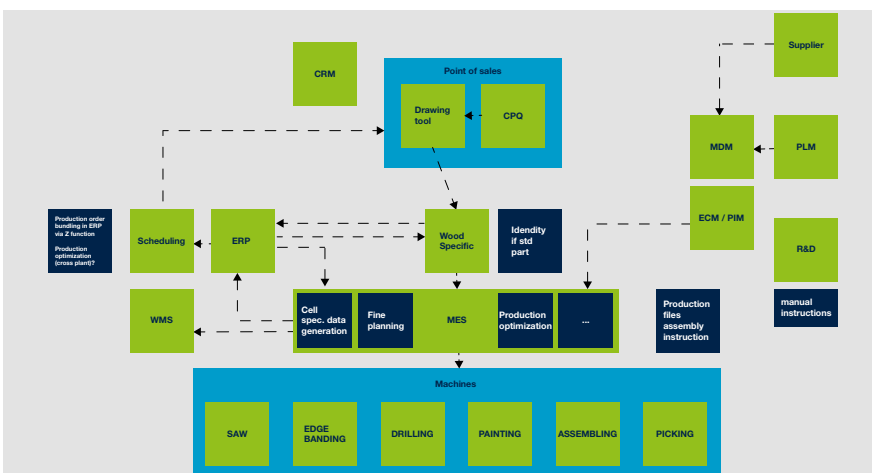

Which material flow guarantees the shortest path and the most efficient production?

How can design details be simplified or cleaned up? Is it possible to design components modularly?

2 OUR FOCUS

- Products: How can design engineering details be simplified or cleaned up? Is it possible to give components a modular design?
- Manufacturing principle: Does order-specific manufacturing (MTO) with batch size 1 match the order structure? Or does it make sense to produce parts for interim storage (MTS)? Which changes should be introduced?
- Material flow and machine positioning: How can parts and batches flow even more efficiently through production in the future?
- Logistics in production: Which methods of transport are suitable for raw material, components and auxiliary materials?
- Organization: How can it be ensured that information flows correctly and smoothly from order intake to shipping?

All relevant information flows from order entry to shipping thanks to the data flow organization.
