

Strategic.
Efficient.
Focused.

Company EKG –
strategic road map for
the further develop-
ment of a company

SCHULER Company EKG

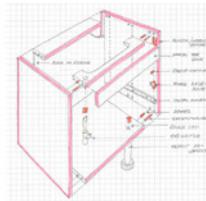

Strategic road map for the further development of a company

Continuous growth and changes in objectives and framework conditions usually go hand-in-hand with a further development of established structures. The SCHULER Company EKG is a strategic road map for the further development of your organization and internal structures. We will draft a strategic concept together on site, which is,

of course, tailor-made to match your corporate goals, processes, production and organization. The objective: identifying potential to increase efficiency and improve performance. The concept study offers you the basis to make focused decisions, implement suitable measures and align your company in a tailor-made and long term manner.

1 YOUR BENEFITS

- Custom-fit, strategic concept as a **road map** for future decisions
- Decision making **security** given that subsequent decisions are based on transparent findings and facts
- Specific recommendations for **optimization** that can be implemented immediately
- Recommendations for the **long-term development** of the company

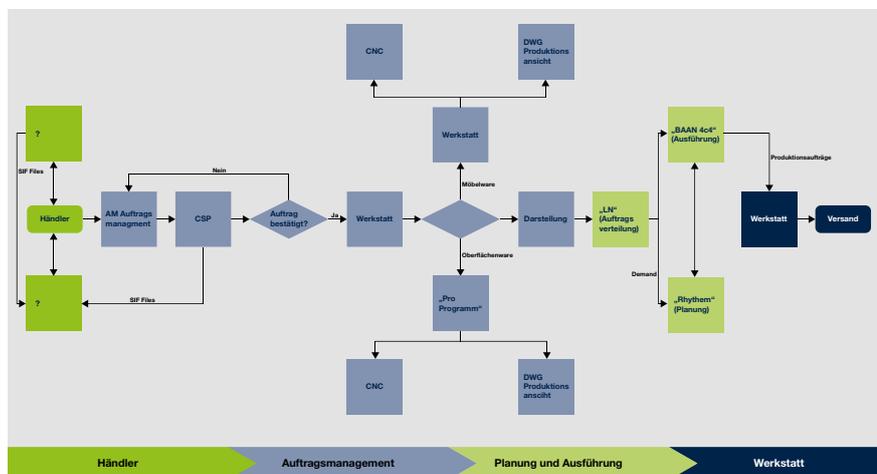

Which material flow guarantees the shortest route and the most efficient production?

Products - How can design engineering details be simplified or cleaned up? Is it possible to give components a modular design? Source: Hanjo Kreyer

2 OUR FOCUS

- Products: How can design engineering details be simplified or cleaned up? Is it possible to give components a modular design?
- Manufacturing principle: Does order-specific manufacturing (MTO) with batch size 1 match the order structure? Or does it make sense to produce parts for interim storage (MTS)? Which changes should be introduced?
- Material flow and machine positioning: How can parts and batches flow even more efficiently through production in the future?
- Logistics in production: Which methods of transport are suitable for raw material, components and auxiliary materials?
- Organization: How can it be ensured that information flows correctly and smoothly from order intake to shipping?

All relevant information flows from order intake to shipping thanks to data flow organization.
