

materialManager

All material data and stocks – well structured in only one digital application.

The variety of materials is constantly increasing and with it the spectrum of material stocks and variants in your company. But how do you best keep an overview of your materials and their data? With materialManager (central material management) you can register and organize all information about your edgbanding and panel materials in your company in a comprehensive and detailed overview.

Your benefits at a glance

- ✔ Overview of all materials and the stocks of your edgbandings (central material management in the company)
- ✔ Clear representation of the material properties
- ✔ Use of material data in other digital HOMAG applications (e.g. intelliDivide)
- ✔ For managing up to 100 different types of edges and panels
- ✔ Simple use as a web application (no software installation necessary)

materialManager / Edgebands / ABS 1mm H3304

Technical data	Additional data
Decor name	Eiche natur
Decor code	H3303
Embossing	ST10
Height	23 mm
Thickness	1 mm
Material	Other
Process	Hotstamped glue
Manufacturer's data	HOMAG

In the detailed view you can see all information at a glance.

	51.01	51.01	Fach 1 - 07	

Overview of rest length and storage space of each edgeband.

Special features

- Automatic availability of material data in other digital products
- Panel library for intelliDivide (optimization software for cutting and dividing panels in a nesting process)

Technical requirements

- The materialManager is a browser application for use on a PC or laptop
- For the use on the PC or laptop we recommend the browsers „Microsoft Edge“, „Google Chrome“ or „Firefox“
- Internet access (DSL, UMTS, LTE): at least 5 Mbit / recommended 50 Mbit
- Registration via tapio Login (tapio account required, www.tapio.one)

All information

You can find more information on our website: homag.com/materialmanager

Test free of charge

Use the app for 30 days free of charge! Book directly in the tapio Shop: www.tapio.one

First steps

You can find helpful tips for use and licensing on our documentation page: docs.homag.cloud
